

## TECHNICAL BULLETIN

**To:** Service Champ

**SUBJECT:** 2014 MAZDA 6 FILTER APPLICATION CORRECTION

**DATE:** 8/30/13

**Bulletin No:** 13.8.30

The 2013 Service Champ Filter Application Guide incorrectly lists Service Champ® oil filter number OF241 and Mileguard® oil filter number MO3614 as the applications for 2014 Mazda 6 vehicles with 4 cyl. 2.5L engines. To correct this issue, this Technical Bulletin amends the Application Guide by removing OF241 / MO3614 and replacing with OF4622 / MO6607 as the correct application. Fram Filtration advises customers to make a hand-written correction to all paper copies of the Application Guide. FRAM Filtration has sent updates to all currently supplied online databases.

Models OF4622 / MO6607 oil filters are tapped to the correct diameter and will fit 2014 Mazda 6 vehicles with 4 cyl. 2.5L engines. However, the OF241 / MO3614 filters are tapped at  $\frac{3}{4}$  inch diameter, whereas the engine stud is 20mm. Since the engine stud is larger than the filter tapping diameter, it is not possible to install the OF241 / MO3614.
